

SGS

THE FSC NATIONAL FOREST STEWARDSHIP STANDARD OF BOSNIA AND HERZEGOVINA

This checklist presents the SGS template for forest certification against the FSC Principles and Criteria. The Checklist reflects the requirements set out in FSC-STD- BiH 01 2019 issued in January 2019 for Bosnia & Herzegovina

This standard forms the basis for:

- Scoping assessment
- Certification assessment
- Surveillance assessment
- Information to stakeholders on the assessment criteria used by SGS

CHANGES SINCE THE PREVIOUS VERSION OF THE STANDARD

| Section | Change | Date |
|---------|--|--|
| New | The FSC National Forest Stewardship Standard of Bosnia and Herzegovina | Approval date: 09. January 2019 Proposed effective date: 22. March 2020 |
| | The contact person and new address of the International contact was updated. Qualifor name was deleted in the document content. This not requires a new version of the document because the content was not affected | Feb 2021 |

LAYOUT OF THE STANDARD:

The standard follows the FSC Principles and Criteria of Forest Stewardship (January, 2000). The Standard is divided into 10 sections, each corresponding to one of the FSC principles with the criteria listed underneath each principle. Refer below for further clarification.

Each page of the standard is divided into 3 columns. The standard also serves as the checklist that is used during an assessment and for every criterion the following is provided:

| | This outlines the norm or indicators that requires for compliance with the specific FSC criterion. A potential source of information or evidence that allows an auditor to evaluate compliance with an indicator. Some indicators make a distinction between the requirements for "normal" forests and SLIMF operations (Small and Low Intensity Managed Forests). | |
|--|---|--|
| | Verifiers are examples of what the SGS assessor will look for to ascertain if the specific norm or indicator has been met. This list is not exhaustive and the assessor may use other means of verifying the relevant indicator. | |
| Guidance The FSC Principle | Guidance is written in <i>italics</i> and assists the assessor in understanding the requirement of the specific indicator. | |
| PRINCIPI 1. COMMUNITY RELAT Forest management operations shall mainta being of forest workers and local communit | | |
| Criterion 4.1: The communities within, or adjacent to, the forest management area should be given opportunities for employment, training, and other services | | |
| | for employment, training, and other services | |
| Indicator 4.1.6 | for employment, training, and other services Verifiers & Guidance: | |
| | | |
| Indicator 4.1.6 Policies and procedures and the implementation thereof make qualifications, skills and experience the basis for recruitment, placement, training and advancement of staff at all levels | Verifiers & Guidance: No evidence of discrimination on the basis of: race, colour, culture, sex, age, religion, political opinion, national extraction or social origin Employment policies and procedures. Interviews with Forest Managers, workers and Labo | |

THE STANDARD

PRINCIPLE 1. COMPLIANCE WITH LAWS:

The Organization* shall* comply with all applicable laws*, regulations and nationally-ratified* international treaties, conventions and agreements. (P1 P&C V4)

Criterion 1.1 The Organization* shall* be a legally defined entity with clear, documented and unchallenged legal registration*, with written authorization from the legally competent* authority for specific activities.

| | - |
|--|---|
| Indicator 1.1.1 | Verifiers & Guidance: |
| Legal registration* to carry out all activities within the scope of the certificate is documented and unchallenged | For forest management organization: - The decision on registration or the current excerpt from the court register - Identification number - Unique identification number - Contract on the use of forests and forest lands |
| | |
| Indicator 1.1.2 | Verifiers & Guidance: |
| Legal registration* is granted by a legally competent* authority according to legally prescribed processes | Contract on the use of forests and forest lands Discussion with chief of legal department The decision on registration or the current excerpt from the court register |

Criterion 1.2 The Organization* shall* demonstrate that the legal* status of the Management Unit*, including tenure* and use rights*, and its boundaries, are clearly defined. (C2.1 P&C V4)

| Indicator 1.2.1 | Verifiers & Guidance: |
|---|--|
| Legal* tenure* to manage and use resources within the scope of the certificate is documented. | For forest management organization: - Contract on the use of forests and forest lands |
| | |

| Indicator 1.2.2 | Verifiers & Guidance: |
|---|--|
| The legal basis of ownership/user rights for the management/use of forest resources is granted by legally competent institutions according to legally prescribed procedures | The decision on registration or the current excerpt from the court register Discussion with chief of legal department |

| Indicator 1.2.3 | Verifiers & Guidance: |
|---|---|
| The boundaries of all Management Units* | - Documentation check |
| within the scope of the certificate are | - Cadastre excerpt |
| clearly marked or documented and | - Official gazettes describing the boundaries of forest areas |
| clearly shown on maps | - Topographic maps with the boundaries of forest areas |
| | - Bylaws regulating the way of marking the borders |
| | Verify the compliance of the boundaries on the field with data from the documentation |
| | |

| Criterion 1.3 The Organization* shall* have legal* rights to operate in the Management Unit*, which fit the legal* status of The Organization* and of the Management Unit*, and shall* comply with the associated legal* obligations in applicable national and local laws* and regulations and administrative requirements. The legal* rights shall* provide for harvest of products and/or supply of ecosystem services* from within the Management Unit*. The Organization* shall* pay the legally prescribed charges associated with such rights and obligations. (C1.1, 1.2, 1.3 P&C V4) | |
|---|---|
| Indicator 1.3.1 | Verifiers & Guidance: |
| All activities undertaken in the Management Unit* are carried out in compliance with: 1) Applicable laws* and regulations and administrative requirements at all levels in BiH (state, entity, district, canton, local community) 2) Legal* and customary rights*; and 3) Obligatory codes of practice*. | Documentation check: Updated database of applicable laws, by-laws and administrative requirements at all levels of government in BiH, ratified international treaties, regulations and conventions, available to all interested parties Findings of inspection bodies Discussion: Employees of the forest management organization/forest owner Consultation* with: Competent inspection bodies |
| | |
| Indicator 1.3.2 Payment is made in a timely manner* of all applicable legally prescribed charges connected with forest* management | Verifiers & Guidance: Documentation check: - Written evidence on payment of fees and obligations Discussion with: - Employees of the forest management organization/forest owner Consultations with: - Competent inspection bodies - Beneficiaries of payment Other interested parties |
| Indicator 1.3.3 | Verifiers & Guidance: |
| Activities covered by the management plan* are designed to comply with all applicable laws* | Forest management plans Annual management plans Updated database of applicable laws, by-laws and administrative requirements at all levels of government in BiH, ratified international treaties, regulations and conventions, available to all interested parties Findings of inspection bodies Consultations with: Employees of the forest management organization/forest owner Competent inspection bodies |
| Criterion 1.4 The Organization* shall* develop and implement measures, and/or shall* engage with regulatory agencies, to systematically protect the Management Unit* from unauthorized or illegal resource use, settlement and other illegal activities. (C1.5 P&C V4) | |
| Indicator 1.4.1 | Verifiers & Guidance: |
| Measures are implemented to provide protection* from unauthorized or illegal harvesting, hunting, fishing, trapping, collecting, settlement and other unauthorized activities. | Documentation check: System and procedures of monitoring and protection of forests from unauthorized activities Web pages with link to alert and description of prescribed procedure Records and reports on perceived phenomena and measures taken by the forest management or-ganization/forest owner and other competent institutions |

PRINCIPLE 10. IMPLEMENTATION OF MANAGEMENT ACTIVITIES:

Management activities conducted by or for *The Organization** for the *Management Unit** *shall** be selected and implemented consistent with *The Organization**'s economic, environmental and social policies and *objectives** and in compliance with the *Principles** and *Criteria** collectively. (new)

Criterion 10.1 After harvest or in accordance with the *management plan**, *The Organization* shall**, by natural or artificial regeneration methods, regenerate vegetation cover in a timely fashion to pre-harvesting or more *natural conditions**. (new)

| Indicator 10.1.1 | Verifiers & Guidance: | | |
|---|---|--|--|
| Indicator 10.1.1 Harvested sites are regenerated in a timely manner* that: 1. Protects affected environmental values*; and 2. Is suitable to recover overall pre-harvest* or natural forest* composition and structure. | Verniers & Guidance: Documentation check: Forest management plans (focus on harvesting plan and restoration plan/reforestation) Field check whether the management activities were carried out in accordance with the plans and whether the areas where the harvesting was carried out were timely restored as in the Indicator 10.1.1 Discussion with: Professional services of the forest management organization/forest owner | | |
| | - Representatives of interest groups | | |
| Indicator 10.1.2 | Verifiers & Guidance: | | |
| Regeneration activities* are implemented in a manner that: | Documentation check: - Forest management plans (focus on harvesting plan and restoration plan/reforestation) | | |

| 1. For harvest of existing plantations*, regenerate to the vegetation cover that existed prior to the harvest or to more natural conditions* using ecologically well-adapted species; | Field check whether the management activities were carried out in accordance with the plans and whether the areas where the harvesting was carried out were timely restored as in the Indicator 10.1.1 | |
|--|---|--|
| 2. For harvest of natural forests*, regenerate | | |
| to pre-harvest* or to more natural conditions*; or | Discussion with: | |
| 3. For harvest of degraded natural forests*, regenerate to more | Professional services of the forest management organization/forest owner | |
| 4. natural conditions*. | | |
| | Consultations with: - Representatives of interest groups | |
| | - Representatives of interest groups | |
| | | |
| Criterion 10.2 The Organization* shall* use species for regeneration that are ecologically we adapted to the site and to the management objectives*. The Organization* shall* use native species* and local genotypes* for regeneration, unless there is clear and convincing justification for using others. (C10.4 and C10.8 P&C V4) | | |
| Indicator 10.2.1 | Verifiers & Guidance: | |
| Species* chosen for regeneration are | Documentation check: | |
| ecologically well adapted to the site, are native species* and are of local provenance, | - Forest management plans (focus on restoration plan/reforestation) | |
| unless clear and convincing justification is provided for using non-local genotypes* or | - Evidences of the origin of the planting material | |
| non-native species*. | - Elaborate on justification of the use of allochthonous planting material (if any) | |
| | Discussion with: | |
| | Professional services of the forest management organization/forest owner | |
| | | |
| Indicator 10.2.2 | Verifiers & Guidance: | |
| Species chosen for regeneration are | Documentation check: | |
| consistent with the regeneration objectives* and with the management objectives*. | Forest management plans (focus on restoration plan/reforestation) | |
| | - Elaborate on justification of the use of allochthonous planting material (if any) | |
| | Discussion with: | |
| | - Professional services of the forest management organization/forest owner | |
| | | |
| Criterion 10.3 The Organization* shall* | only use alien species* when knowledge and/or | |
| experience have shown t | that any invasive impacts can be controlled and sures are in place. (C6.9 and C10.8 P&C V4) | |
| Indicator 10.3.1 | Verifiers & Guidance: | |
| Alien species* are used only when direct | Documentation check: | |
| experience and / or the results of scientific re- search demonstrate that invasive impacts can | Forest management plans (focus on restoration plan/reforestation) | |
| be controlled. | - Elaborates on control of the invasive influence of used autochthonous planting material (if any) | |
| | - Scientific and professional papers that point out to the possibility of controlling the invasive influence of allochthonous species | |

| Indicator 10.3.2 | Verifiers & Guidance: | |
|---|---|--|
| Alien species* are used only when effective | Documentation check: | |
| mitigation measures are in place to control their spread outside the area in which they are established. | - Forest management plans (focus on restoration plan/reforestation) | |
| | Field check whether effective measures have been taken to mitigate the negative impact of allochthonous species | |
| | | |
| Indicator 10.3.3 | Verifiers & Guidance: | |
| The spread of invasive species* introduced by the Organization* is controlled. | Documentation check: - Forest management plans (focus on restoration plan/reforestation) | |
| | Programme/system of control for monitoring and spreading of invasive species | |
| | - Evidences on implementation of programme/system of control for monitoring and spreading of inva-sive species | |
| | Field check whether there is a spread of invasive species, whether control measures have been imple-mented to monitor and spread invasive species (if any) and whether there are any eventual socio-ecological impacts | |
| | | |
| Indicator 10.3.4 | Verifiers & Guidance: | |
| Management activities are implemented, | Documentation check: | |
| preferably in cooperation with separate regulatory bodies where these exist, with an aim to control the invasive impacts of alien species* that were not intro-duced by the Organization* | - Agreements and evidences on cooperation with regulatory bodies (if any) | |
| | | |
| Criterion 10.4 The Organization* shall* Management Unit*. (C6.8 | not use <i>genetically modified organisms</i> * in the P&C V4) | |
| Indicator 10.4.1 | Verifiers & Guidance: | |
| Genetically modified organisms* are not used. | Documentation check | |
| | Forest management plans (focus on restoration plan/reforestation) | |
| | - Evidences of non-use of GMOs (orders, instructions etc) | |
| | Field check whether GMOs are being used | |
| | Discussion with: | |
| | Professional services of the forest management organization/forest owner | |
| | Consultations with: | |
| | - Representatives of interest groups | |
| | | |
| Criterion 10.5 <i>The Organization* shall*</i> use silvicultural practices that are ecologically appropriate for the vegetation, species, sites and <i>management objectives*</i> . (new) | | |
| Indicator 10.5.1 | Verifiers & Guidance: | |
| | | |

| Silvicultural practices are implemented that are ecologically appropriate for the | Documentation check: |
|--|--|
| vegetation, species, sites and management objectives*. | - Forest management plans (focus on implementation projects and silviculture plans |
| | Field check whether ecologically appropriate practices of silviculture are implemented |
| | Discussion with: |
| | - Professional services of the forest management |
| | organization/forest owner |
| | |
| fertilizers* are used, The or more ecologically and systems that do not requ | minimize or avoid the use of <i>fertilizers*</i> . When Organization* shall* demonstrate that use is equally economically beneficial than use of silvicultural ire fertilizers, and prevent, mitigate, and/or repair al values*, including soils. (C10.7 P&C V4 and Motion |
| Indicator 10.6.1 | Verifiers & Guidance: |
| The use of fertilizers* is minimized or avoided. | Documentation check: |
| | - Forest management plans (focus on implementation projects, afforestation and silviculture plans) |
| | - Evidences of the forest management organization/forest owner to reduce the use of artificial fertiliz-ers with a goal to completely stop using fertilizers |
| | - Register of used artificial fertilizers including all fertilizer documentation |
| | - Results of soil analysis |
